DETAILED ACTION

Drawings

1. Figures #1, #2, and #3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the control-type magnetic bearing as claimed in Claim #1, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1,2,3,4, and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. In regards to Claim 1, "in the rear of the stage", non-linear component, the placement of the control input signal and the current input added in relation to the output or input amplifier, are not described in a full, clear, and concise manner in order for the examiner to fully understand the claimed invention of the applicant.

6. In regards to Claim 2, the comparator circuit needs to be described in a full, clear, and concise way as for the examiner to understand the claimed invention of the applicant.

7. In regards to Claims 3,4, and 5 the remover and the bands needs to be disclosed in a full, clear, and concise manner in order for the examiner to understand the claimed subject manner of the applicant. In relation to the band is it AM or FM?

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1,2,3,4, and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Shinozaki (WO 99/41510).

Shinozaki discloses in Figure 8 a magnetic bearing apparatus having a amplifier (35) for supplying a control current to a coil of an electromagnet (21) of a control-type magnetic bearing in which an apparatus characterized in that a non-linear component (comparator circuit)(31) is provided in the rear of a stage. Including a control input signal of the amplifier (35) and a current feedback signal (39d) are added. In addition a remover (LPF)(39) is provided at an output side of the non-linear component (31) for removing a displacement sensor carrier frequency signal band, with a remover (BEF)(30) provided at an input side of the non-linear component (31) for removing a pulse width modulation (PWM) power amplifier carrier frequency signal band.
